SUMMARY

Software Engineer building **REST APIs** with **Node.js/Express** and **Django REST Framework** on **PostgreSQL**. Resolved **production incidents** rooted in module resolution and **async data loading**; in projects, built **multi-tenant APIs** and **cut latency** up to **150x** through indexing, caching and background jobs.

EDUCATION

Vellore Institute of Technology **Oct 2022 – Oct 2026**
Bachelor of Technology (B.Tech), Computer Science and Engineering *CGPA: 8.80/10.0*

TECHNICAL SKILLS

Programming Languages:	C++, Python, JavaScript, SQL
Backend & Databases:	Node.js, Express.js, Django, Django REST Framework, PostgreSQL, REST APIs
Frontend:	React.js, HTML5, Tailwind CSS
DevOps & Cloud:	AWS, Docker, GitHub Actions
Testing & Tools:	pytest, Postman, Git, GitHub, JIRA

EXPERIENCE

American Chase **Mar 2026 – Present**
Software Engineer – Full-time *Indore, MP*

- Restored a **customer-data API**, down for **8 hours**, by fixing imports in **37 modules** that Node's **ESM loader** rejected.
- Ensured product responses consistently returned **complete metadata** by making routes await a **shared refresh promise**.
- Traced a **schema-validation defect** from **3 failing tests** to a reversed **set-difference**; verified the fix with **16 tests**.
- Implemented shared **middleware** to unify error handling across **10 APIs** and log failures by **request ID**.
- Collaborated with senior engineers in a **20+ member** team on an **AI assistant** for the client-side operations team.

PROJECTS

Lattice - Multi-Tenant Content Engine | *Python, Django (DRF), PostgreSQL, Docker* | [GitHub] [Live] **Sep – Oct 2026**

- Built a **multi-tenant** content engine where organizations define their own content types at runtime via a **REST API**.
- Secured the APIs with **JWT** auth, hashed **API keys** and **tenant isolation** checks, covered by **50+ pytest tests** in **CI**.
- Cut list query time from **46ms to 0.3ms** with a **composite index**, verified by **k6** load tests at **100k entries**.
- Eliminated per-type migrations by storing entries as **JSONB**, validated against immutable, **versioned JSON Schemas**.

RakshaChakra - Behaviour-Based Authentication | *Python, Flask, REST APIs, AWS* | [GitHub] **Jun – Jul 2025**

- Built a **Flask** backend on **AWS EC2** that scores **25+ behavioural features** per session to **predict login risk**.
- Raised throughput from **27 to 101 req/s** and cut p50 latency from **3.5 s to 140 ms** with a per-user **ETag** cache.
- Cut prediction latency under mixed load from **2 s to 38 ms** by moving 8–18 s training jobs to **background processes**.
- Eliminated intermittent **HTTP 500s** during model retraining by adding per-user **file locks** to fix a **race condition**.

ACHIEVEMENTS & CERTIFICATIONS

- **TCS CodeVita 2025: Top 5%** of 100,000+ participants (**Rank 4,811**).
- **Canara Bank Suraksha Hackathon 2025: Top 3%** (Top **105** of **4,000+** teams).
- **LeetCode:** Published **90+ solution write-ups** with **50K+ views** from the community.
- **Gen AI Using IBM watsonx** – IBM Career Education Program (Apr 2025) **[Credential]**
